
Modbox Download For Pc [hack]

Download ->->->-> <http://bit.ly/2JXERor>

About This Game

Modbox is a VR sandbox where you can use mods to create game experiences and share them online.

Go online to play multiplayer creations together in a variety of game modes - or create your own game worlds by piecing parts together.

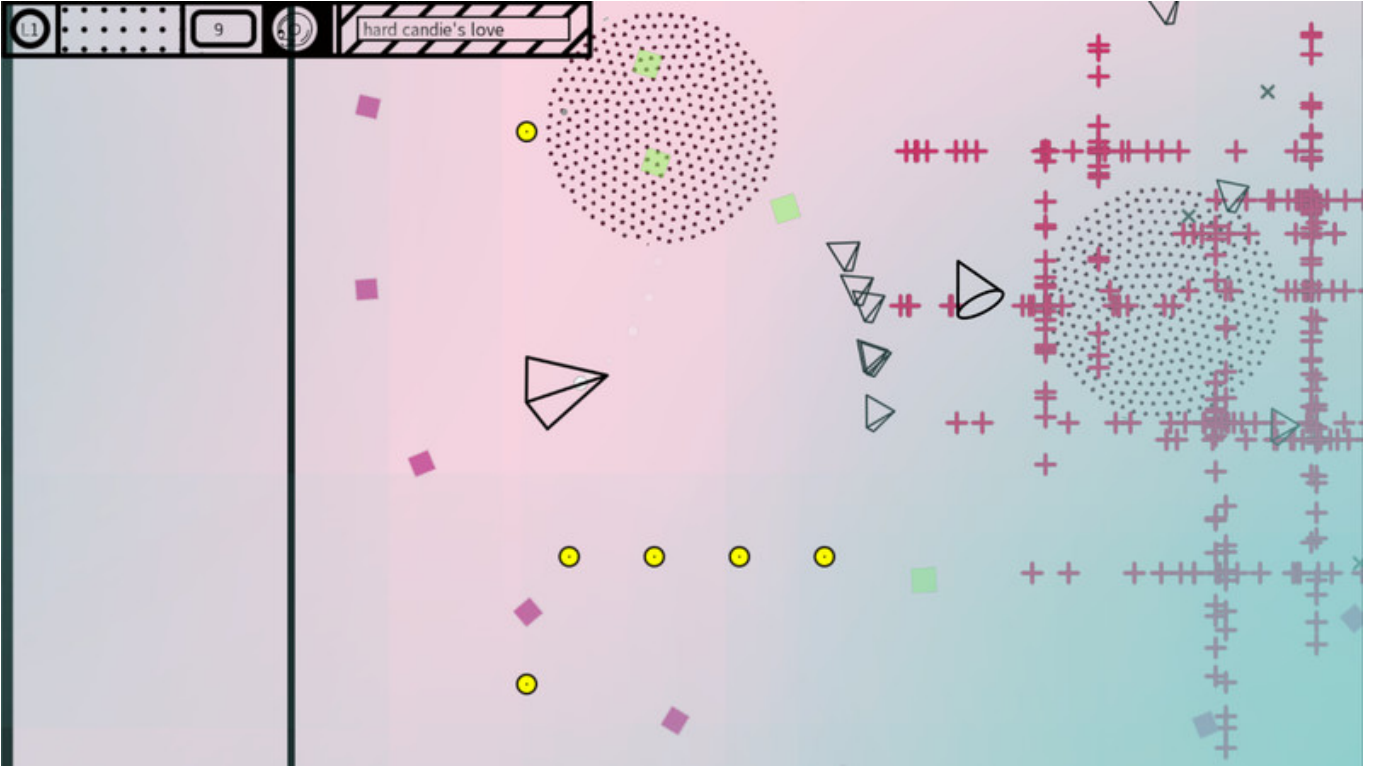

- Select from a large selection of mods to choose content for your creations
- Over 1000+ different building parts - with even more included in user created mods on the Steam Workshop
- Check out tutorials and our wiki at <http://www.modboxgame.com/> on how to build
- Share your work on Steam workshop ingame, or try out others online
- Construct with primitives by just touching them together. Add in hinge joints, ropes, propellers, rockets, piston, balloons. Then control them by wiring them together with throttles and levers.
- Pick up and play with toys to interact with the world - including baseball bats, basketballs, crossbows, pistols, chainsaws...

-
- Add NPCs and characters to your creations to interact with
 - Use the ModboxSDK to create new building parts, avatars, and starting environments

Title: Modbox
Genre: Casual, Indie, Simulation, Early Access
